WORKBOOK TEMPLATE

Project Name:

Online Library Management System

1. Problem Statement

Many libraries still manage book records, member details, book issue and return using manual registers. Students and readers cannot easily check book availability, due dates or fines, and librarians spend a lot of time on record keeping. The online library management system provides book search, issue, return and member management in one simple place.

2. Why Does the Problem Exist?

- Manual record keeping
- Difficult to search for books
- No online book availability information
- Delay in book issue and return process
- Due dates and fines are not tracked properly
- Duplicate or lost records
- Limited access outside library hours

3. Internal Stakeholders

- Librarian – manages books, members and issue/return records.
- Library Administrator – manages users and reports.
- System Administrator/Developer – maintains website and database.

4. External Stakeholders

- Students – search and borrow books.
- Teachers/Faculty – request and reference books.
- Readers/Members – reserve and renew books.
- Publishers/Suppliers – provide new books.
- College Management – monitors library usage.

5. Expected System Users

- Administrator
- Librarian
- Member (Student/Reader)

WORKBOOK – OBJECTIVES & OUTPUTS

6. Objectives of the Project

- Develop an online library management system.
- Allow members to search books easily.
- Provide book availability, issue date and due date information.
- Manage book issue, return, renewal and fines online.
- Reduce manual work and time spent by librarians.

7. Expected Outputs

- Book catalogue
- Online book search
- Book issue and return records
- Due date and fine information
- Member records
- Admin dashboard
- Library records and reports

8. Hands-on Activity

- Collect library book and member information.
- Identify book categories.
- Collect issue, return and fine rules.
- Design website interface.
- Create search, issue and return workflow.
- Design database tables for users, books, members, issue records and categories.
